

Assignment 3 – Resolution of a complex professional problem Issue
(Individual)

Deliverables and Submission:

Item	Type	Due
Business Report including Executive summary and AI Reflection	A written report submitted on Moodle	Friday 11:55 pm Week 12
Professional Conversation	Face to face professional conversation Professional Conversation with your tutor	Scheduled within week 14 and 15 arranged by tutors

Value and Marking guidelines: The assignment is worth 35% of the total marks for the unit.

Item	Allocated Mark
Business Report Executive Summary	4
Business Report	2
AI use reflection	4
Professional conversation	25

Aims:

This assignment is an opportunity for you to showcase your understanding of, and apply the learning of the Professional Practice curriculum. In this assessment you should demonstrate your ability to:

- Identify and address the relevant professional practice issues raised in a given situation
- Critically evaluate how to plan and structure a more complex communication and produce an effective communication while using AI tools professionally to achieve quality results.

Faculty of Information Technology

FIT5122 Professional Practice

- Assess the needs of a specific audience and develop and meet those needs.
- Be able to explain and justify your recommendations.

Background:

The final piece of assessment for FIT 5122 is a combination of the formal written business report and a professional conversation reflecting on your Professional Practice learning (through the readings, activities and assessment items that you have completed). Your written report provides the context for the professional conversation; the professional conversation focuses on how you apply, justify and reflect on your recommendations as a professional.

The assignment:

You will write a formal business report addressing the issue(s) raised, including an executive summary of your detailed findings and recommendations.

After submitting the written report, you are invited to meet with your Tutor (in the role of manager/executive) to answer any outstanding questions they may have on the report.

You **may use AI tools** for this assignment, provided their use is professional, transparently documented and critically evaluated

Your task:

You are a senior IT focused employee of your organisation and you have been asked by your manager to report on a specific issue that is affecting your organisation currently.

You will be given a scenario and issues. You will analyse the issue and provide your solutions and recommendations to a senior executive audience in your organisation.

You will complete a written report and participate in a face to face Professional Conversation with your tutor:

The written report will include:

- An executive summary (350 - 550 words) and
- Your detailed findings and recommendations (1700 - 2500 words).
- You reflection on your use of AI tools, or why you chose not to use AI.(300–500 words), which should contain:
 - Disclose Usage: Explain which AI tools were used and for what specific tasks (e.g., brainstorming, structuring, or drafting sections)
 - Critical Evaluation: Reflect on whether the output was "good or bad."

Faculty of Information Technology

FIT5122 Professional Practice

- Did it align with the professional quality required for a business report?
- Error Identification: Identify any errors, hallucinations, or irrelevant information produced by the AI
 - Editorial Changes: Detail the specific changes, fact-checking, and refinements made to the AI output to ensure it met the needs of a senior executive audience and correctly applied FIT5122 curriculum concepts

You will participate in a 15 minute Professional Conversation with your Tutor, in the role of senior executive, asking questions about your case study.

The purpose of this conversation is to assess your professional judgement, your ability to explain and defend decisions, and your capacity to communicate clearly and professionally in an executive context. Your written report provides the context for the discussion, but the conversation focuses on how you think and reason as an IT professional, rather than on recalling or restating written content. You will be asked to justify, evaluate and reflect on your recommendations, and to discuss how key Professional Practice concepts from FIT5122 (such as communication, teamwork, quality, ethics and professional responsibility) apply to your scenario.

The conversation will include in-depth questions about how particular learnings from professional practice might apply in these scenarios. Considering the material covered over the course of the semester in your analysis and investigate if any of the following can be identified in your given scenario:

- Actual or potential ethical or privacy issues
- Actual or potential cultural and team issues
- Actual or potential communication issues
- Actual or potential quality and reliability issues
- Actual or potential presentation and meetings issues
- How you used AI in the preparation of the report (i.e. professional use of AI)

The specific issue for your scenario will be detailed in a separate document that explains the scenario, the rubric below applies to all scenarios.

Assessment 4: Business Report Rubric		N Unacceptable Fails to identify what is required	P Basic Reflects the beginnings of understanding what’s required	C Expected Obvious understanding and delivery of what is required	D Good Reflects a mastery of what is required	HD Excellent Reflects the highest level of performance, beyond what is required
Section	Grade	Criteria				
Exec summary - [4 marks]

FIT5122 Professional Practice

Explanation of problem/context and ability to access information.	The reader will not understand problems, findings or recommendations without reading the report, this is an introduction not an exec. summary	The reader will get some idea of the problem, findings and recommendations but will have to read the report	Clear statement about the problem and context of the report Clear explanation of the problem	A clear statement about the context of the report Clear and relevant explanation of the problem.	A comprehensive, clear and concise explanation of the problem/context.
The major findings of the report	No explanation of the analysis of the problem or findings of the report	Limited explanation of the analysis of the problem or findings of the report	Satisfactory explanation of the analysis of the problem or findings of the report	Good explanation of the analysis of the problem or findings of the report well explained	Insightful analysis of the problem and excellent findings are extremely well explained.
The results and recommendations and conclusions	No conclusion or relevant recommendations	Limited or superficial conclusion or recommendations or not relevant to the problem.	Satisfactory conclusion and recommendations.	Good conclusion and relevant recommendations to the problem.	Clear and concise conclusion and/or relevant recommendations that show great insight into the problem.
Business Report - [2 marks]					
Report Content and relevance to topics taught in 5122	Fails to describe the issues	Had missed major point in the case study	Describes the issues and context well	A critical understanding of the issues with reference to the unit study	An insightful understanding of the issues with reference to the unit study and further research
Structure and Organisation of Content: addressing the key content and logically arranging the report, including use of headers, titles , audience taken into account	No structure, no headings, disorganised Incoherent progression	Some structure and organisation but overall difficult to follow the flow of the report Basic coherence and writing style	Adequate structure and organisation, headings and titles, with some inconsistent flow of report Adequate coherence and writing style	Logical structure, organisation, content and flow. Clear and cohesive report and writing style	Comprehensive answers of the problem and a logical structure to the response; A well-linked and balanced report leading to a cohesive and strong piece of writing.
AI Reflection - [4 marks]					

Faculty of Information Technology

FIT5122 Professional Practice

AI Use Reflection	Fails to disclose AI use or provides no reflection on errors, hallucinations, or refinements. Output appears unedited	Minimal disclosure of tools. Reflection is superficial, lacking specific details on AI errors or how the output was refined for the audience	Clear disclosure of tools and tasks. Satisfactory evaluation of quality and identification of some errors. Evidence of basic fact-checking.	Detailed disclosure and critical evaluation. Clear identification of hallucinations. Demonstrates good refinement for a senior executive audience.	Insightful and comprehensive reflection. Deep analysis of AI limitations. Sophisticated refinements that integrate FIT5122 concepts
Professional Conversation - [25 Marks]					
Ability to answer Professional Conversationers questions about report clearly and concisely Professionalism & organisation	The Student shows no understanding of the question asked and does explain the problem, findings or recommendation . The Student's answers to questions are random or not relevant. The Student is unprofessional, reflecting neither effort nor care.	The Student shows little understanding of the questions asked and is only able to show a basic explanation of the problem, findings and recommendations. Questions answered are few in number and surface level. The Student is somewhat professional reflecting minimal effort and care.	The Student is able to answer questions and provides a satisfactory explanation of the problem, Findings and recommendations. The Student is professional, reflecting effort and care.	The Student explains the problem, findings and recommendations well and answers are thoughtful and well considered. The Student is professional and engaging, reflecting extra effort and care.	The Student strongly conveys the problem, findings and recommendations and answers questions in a deep and insightful manner and act professionally The Student is professional, engaging, appealing. Reflecting effort, attention to detail and care
Ability to answer the 5122 specific questions about issues that relate to particular aspects of the FIT5122 curriculum (Professional use of AI, teams, quality, communications, ethical and Legal issue)	Fails to identify what is required. The student is unable to articulate a response or demonstrates a significant lack of understanding of the key curriculum topics. Answers are irrelevant, factually incorrect, or show no connection to the FIT5122 curriculum.	Reflects a basic understanding of the issue. The student provides a vague or generic answer with some accurate points, but lacks specific details or examples from their experience. They may struggle to link their responses directly to the core curriculum topics (teams, quality, communications, ethical and legal issues).	Obvious understanding of the issues in the context of the 5122 Curriculum. The student provides a clear and correct answer, demonstrating a solid understanding of the curriculum topics. They are able to provide some relevant examples from their report or past experience to support their points.	Reflects a mastery of what is required. The student provides a detailed and well-structured answer, demonstrating a strong grasp of the curriculum topics. They provide excellent, relevant examples and can critically analyse how these concepts apply to their report. The answers show a	Reflects the highest level of performance, beyond what is required. The student's answer is highly comprehensive, insightful, and demonstrates a deep, integrated understanding of all the key curriculum topics. They are able to draw connections between different areas (e.g., how ethical issues can impact team dynamics) and can

Extensions and late submissions:

Please note, University policy stipulates that no assignments can have a due date during SWOTVAC or the weekend prior. As a result, extensions to the business report due date that extend into the SWOTVAC can only be granted if exceptional circumstances apply. Please refer to the University's policy on what constitutes special consideration and how to apply. A draft of material prepared up to that point should also be available for your tutor's consideration if requested.

Late assignments will be penalised 5% per day as per University policy.

Hints for writing a business report versus an essay

- Business reports and academic essays are very different. Their objectives, format and the expectation of the reader are different.
- Business reports focus on the practical application of the theory - providing insights and recommendations rather than explaining the theory itself. They are concise, very practical, usually worded in the first person (I / we recommend... etc) and focused on identifying and solving a problem rather than discussing the theories behind the problem / recommendations.

Using references:

If your business report is based on your own ideas, knowledge or expertise (as many are), then referencing is not required. However, if you are sourcing your ideas directly from others' work or wanting to add credibility to your points by referring to a source, then your sources should be acknowledged and a reference included.

As a business report is designed to be a short and very succinct document, referring to your sources in-text can be done in an efficient and succinct way. For example, you could summarise the key points as follows: "The December 2021 edition of XYZ reports that multicultural teams are x times more likely to fail than.....". You should not use academic style footnotes and citations

FIT5122 Professional Practice

Turnitin report, collusion and plagiarism:

An integrated turnitin report is required as part of the submission process and can be found in the business report submission link under Moodle / Assessments. Turnitin is a text-matching software that helps students demonstrate academic integrity in their work.

Instructions for using an integrated turnitin report can be found here -

<https://www.monash.edu/student-academic-success/build-digital-capabilities/master-online-learning-systems/turnitin/how-do-i-use-turnitin>

Please note you can generate an immediate turnitin report before the submission due date. After three attempts, the reports will take 24 hours to generate. The Turnitin report will compare your work against other student papers, the internet, periodicals, journals and publications.

Plagiarism and collusion policies established by FIT and Monash University can be found at:

<https://www.monash.edu/students/study-success/academic-integrity>
